There are few  
shows in our  
lifetime that  
have garnered

over a billion views, that have reached a global audience of 220 countries, that elicits an emotional reaction from a theme song, or that defined a period of time more for its viewers. That is simply because there is no show that is more iconic or beloved than Friends. It didn't matter that their apartment was unrealistic by New York City's standards or that they always had

enough free time to hang out in a coffee shop, they were our friends, they were us. And over the last twenty-seven years, it has yet to lose its title of the greatest sitcom of all time. Yet, the nostalgia and the truth about their relationships is a story that only Matthew Perry could tell--especially as his addiction soared faster than his career. Heartbreaking and funny, Matthew's honesty is

explosive and unrivaled. Friends, Lovers, and the Big Terrible Thing is an unforgettable memoir that shares the most intimate details of the love he lost, his darkest days, and his greatest friends. The Scent of Rain in the Balkans The Fortress Who Says Elephants Can't Dance? sums up Lou Gerstner's historic business achievement, bringing IBM back from the brink of

insolvency to lead the computer business once again. Offering a unique case study drawn from decades of experience at some of America's top companies -- McKinsey, American Express, RJR Nabisco -- Gerstner's insights into management and leadership are applicable to any business, at any level. Ranging from strategy to public relations, from finance to organization, Gerstner reveals the

lessons of a lifetime running highly successful companies. *The Myth of Normal* Sounds True GETTING RICH IS NOT JUST ABOUT LUCK; HAPPINESS IS NOT JUST A TRAIT WE ARE BORN WITH. These aspirations may seem out of reach, but building wealth and being happy are skills we can learn. So what are these skills, and how do we learn them? What are the principles that should guide

our efforts? What does progress really look like? Naval Ravikant is an entrepreneur, philosopher, and investor who has captivated the world with his principles for building wealth and creating long-term happiness. The Almanack of Naval Ravikant is a collection of Naval's wisdom and experience from the last ten years, shared as a curation of his most insightful interviews and

poignant reflections. This isn't a how-to book, or a step-by-step gimmick. Instead, through Naval's own words, you will learn how to walk your own unique path toward a happier, wealthier life. The Fortress is one of the most significant and fascinating novels to come out of the former Yugoslavia. Ahmet Shabo returns home to eighteenth-century Sarajevo from the war in Russia, numbed by

the death in battle or suicide of nearly his entire military unit. In time he overcomes the anguish of war, only to find that he has emerged a reflective and contemplative man in a society that does not value, and will not tolerate, the subversive implications of these qualities.

We're living in a time of unprecedented access to high-reward, high-dopamine stimuli: drugs, food, news, gambling, shopping, gaming, texting, sexting, Facebooking, Instagramming, YouTubing, tweeting . . . The increased numbers, variety, and potency is staggering. The smartphone is the modern-day hypodermic needle, delivering digital dopamine 24/7 for a wired generation. As such we've all become vulnerable to compulsive overconsumption. In *Dopamine Nation*, Dr. Anna Lembke, psychiatrist and author, explores the exciting new scientific discoveries that explain why the relentless pursuit of pleasure leads to pain . . . and what to do about it. Condensing complex neuroscience into easy-to-understand metaphors, Lembke illustrates how finding contentment and connectedness means keeping dopamine in check. The lived experiences of her patients are the gripping fabric of her narrative. Their riveting stories of suffering and redemption give us all hope for managing our consumption and transforming our lives. In essence, *Dopamine Nation* shows that the secret

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors

have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful

critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history

becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic

organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities,

than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing

society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations
