NCCN Guidelines for Patients® Independently Published

Showcasing the expertise of top-tier specialists who contributed to the newly released guidelines for the care of thrombosis in cancer patients, this exciting guide was written and edited by members of the American Society of Clinical Oncology panel, (ASCO), on the prevention and treatment of cancer-associated thrombosis, among others, and provides

Genitourinary Cancers Springer Nature

Despite the rising popularity of the minimally invasive laparoscopic option, open nephron-sparing surgery is still seen by many experts as the 'gold standard' for open surgery for kidney tumors and should remain the first choice for many patients. This challenges the idea that less-invasive therapies are always more desirable than open surgery. Whi

NCCN Guidelines for Patients® Small Cell Lung Cancer Springer

Considered one of the most devastating and frightening of all cancers, cancers of the central nervous system (CNS) attack the complex organs that control not only the CNS but also the peripheral nervous system and many of the voluntary and involuntary body systems, with 20% to 40% of CNS cancers metastasizing to the brain. Site-Specific Cancer Series: Central Nervous System Cancers, a new volume in the Series edited by Deborah Hutchinson Allen and Laurie L. Rice, details the cancers of the brain and spinal cord. Chapters examine issues such as anatomy and physiology of the brain and spine, patient assessment, pathology, histology, and molecular markers of primary brain tumors, and adult and pediatric cancers of the brain and spinal cord. Other issues include treatment modalities (surgical treatments, chemotherapy, and radiotherapy), as well as pediatric therapeutic modalities, symptom management and psychological issues, and the current state of evidence-based practice. You can use this new volume as a guide to treating your patients and to providing sensitive and realistic care that optimizes the quality of life and permits a sense of hopefulness to prevail when many patients with type of cancer feel only pain and fear.

Kidney Cancer Springer Science & Business Media

[OFFICIAL CURRENT VERSION] From the medical leaders of 27 of the world's most renowned cancer centers united under the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to prostate cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information, treatment innovations, and resources about diagnosis and treatment. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide!Part 1 - Prostate cancer basics: Explains how prostate cancer starts and how it spreads.Part 2 - Cancer staging: Describes how doctors rate the growth of prostate cancer.Part 3 - Treatment planning: Describes how doctors plan your treatment.Part 4 - Overview of cancer treatments: Describes the treatments used to cure or control prostate cancer.Part 5 - Treatment guide: Initial treatment: Presents the options when treating prostate cancer for the first time.Part 6 - Treatment guide: Monitoring: Presents tests that check treatment results and options if local treatment fails.Part 7 - Treatment guide: Systemic treatment: Presents options that control the growth of advanced cancer.Part 8 - Making treatment decisions: Offers tips for choosing the best treatment.A complete glossary with dictionary and acronyms completes this book.

NCCN Guidelines for Patients® John Wiley & Sons

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Cervical Cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Cervical cancer basics, Testing and staging, Types of treatment, Treatment for common types, Treatment, for neuroendocrine carcinoma of the cervix (NECC) Survivorship, Making treatment decisions, Words to know, NCCN, Contributors, NCCN Cancer Centers. Let this authoritative handbook be your guide!

NCCN Guidelines for Patients® Springer Science & Business Media

This pocket book is an up-to-date guide to the diagnostic imaging of head and neck cancers. The focus is particularly on FDG PET/CT, with coverage of the basic principles, clinical indications, typical and atypical appearances, normal variations and artifacts, advantages, limitations, and pitfalls. Consideration is also given to emerging roles for PET/CT in head and neck cancer, including radiotherapy planning and treatment response monitoring, and to radiotracers beyond FDG. In addition, succinct information is provided on clinical presentation, diagnosis, staging, pathology, management, and other diagnostic imaging techniques. A brief discourse on the practice of guideline adoption is included. The book is published within the Springer series Clinicians' Guides to Radionuclide Hybrid Imaging (compiled under the auspices of the British Nuclear Medicine Society) and will be an excellent asset for clinicians, nuclear medicine physicians, radiologists, radiographers, technologists, and nurses who work in the field of head and neck cancer.

Chemotherapy and Immunotherapy in Urologic Oncology Springer

From the medical leaders of 26 of the world's most renowned cancer centers united under the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to kidney cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information, treatment innovations, and resources about the diagnosis and treatment of kidney cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide!Part 1 - KIDNEY CANCER BASICS > Explains where kidney cancer starts and how it spreads.Part 2 - TESTING FOR KIDNEY CANCER > Describes the tests used to find and confirm kidney cancer.Part 3 - CANCER STAGING > Explains how doctors rate the extent of kidney cancer in your body.Part 4 - OVERVIEW OF CANCER TREATMENTS > Describes the types of treatments that may be used for kidney cancer.Part 5 - TREATMENT GUIDE > Presents the recommended course of action from diagnosis to after cancer treatment.Part 6 - MAKING TREATMENT DECISIONS > Offers tips for getting a treatment plan that meets all your needs.Part 7 - Glossary with dictionary and acronyms.

NCCN Guidelines for Patients® Cervical Cancer Springer Nature

From the medical leaders of 26 of the world's most renowned cancer centers united under the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to prostate cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around

the world, these NCCN Guidelines for Patients® are packed with the latest information, treatment innovations, and resources about the diagnosis and treatment of prostate cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide!Part 1 - PROSTATE CANCER BASICS | Explains how prostate cancer starts and how it spreads.Part 2 - CANCER STAGING | Describes how doctors rate the growth of prostate cancer.Part 3 - TREATMENT PLANNING | Describes how doctors plan your treatment.Part 4 - OVERVIEW OF CANCER TREATMENTS | Describes the treatments used to cure or control prostate cancer.Part 5 - TREATMENT GUIDE: INITIAL TREATMENT | Presents options when treating prostate cancer for the first time.Part 6 - TREATMENT GUIDE: MONITORING | Presents tests that check treatment results and options if local treatment fails.Part 7 - TREATMENT GUIDE: ADVANCED CANCER | Presents options for when local cancer treatments aren't enough.Part 8 - MAKING TREATMENT DECISIONS | Offers tips for choosing the best treatment.Part 9 - Glossary with dictionary and acronyms.

Cancer-Associated Thrombosis Springer Nature

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network® (NCCN®) comes this essential guide to Distress During Cancer Care. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: about distress, distress screening, treatment for distress, and getting help. Let this authoritative handbook be your guide!

Central Nervous System Cancers CRC Press

A practical guide to methods of survival analysis for medical researchers with limited statistical experience. Methods and techniques described range from descriptive and exploratory analysis to multivariate regression methods. Uses illustrative data from actual clinical trials and observational studies to describe methods of analysing and reporting results. Also reviews the features and performance of statistical software available for applying the methods of analysis discussed.

NCCN Guidelines for Patients® Springer

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Small Cell Lung Cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Lung cancer basics, Lung cancer staging, Tests for lung cancer, Initial treatment, Surveillance and subsequent treatment, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers. Let this authoritative handbook be your guide!

The Good Looking Cancer Springer Science & Business Media

When one deals with cancer, the hepatobiliary malignancies present a chal lenge to the oncologists that can be characterized as a series of unsolved clinical and biological dilemmas. Liver metastases from colorectal and other gastrointestinal malignancies, hepatocellular carcinoma, cholangiocarcinoma, and gall bladder cancer present an array of problems but have two features in common. These are high morbidity and mortality with an overall poor result from treatment. Why is it that hepatobiliary cancer carries with it such a dismal prognosis? First of all, these diseases present, for the most part, in an advanced state. To this point in time the oncologist has had no help from early diagnosis or screening. Only the occasional patient followed by ultrasound or a tumor marker has the disease diagnosed in an asymptomatic state. By the time these diseases become symptomatic, curative treatment options have usually disappeared. Evolution has placed the liver in a protected position in order to avoid injury to the soft parenchyma. As with many other internal organs, the nerve supply is extremely limited. These two anatomic features result in a great lack of early warning signs of cancer.

Renal Tumors of Childhood Springer Science & Business Media

This book addresses the most pressing current questions in the management of urologic malignancies. The rapid advances in imaging and molecular markers are placed into a clinical context, with explanation of their effects on prognosis and treatment planning. Similarly, progress in immunotherapy is carefully examined, focusing in particular on the role of immune checkpoint inhibitors in both early- and late-stage urologic malignancies. Looking beyond the improvements in minimally invasive techniques for urologic cancers, the impacts of care coordination pathways and enhanced recovery after surgery protocols are reviewed. Readers will also find enlightening discussion of the decision algorithm for the treatment of early-stage, high-grade bladder cancer, taking into account evidence on the most advanced treatment options and the circumstances in which surgery may need to be expedited. The penultimate chapter discusses the Cancer Genome Atlas project for bladder cancer, and the book closes by considering contemporary medical and surgical management of testicular cancer.

NCCN Guidelines for Patients® Elsevier Health Sciences

This book is designed to familiarize clinical practitioners in systemic therapy options and medical management of urologic malignancies including prostate cancer, bladder and upper tract urothelial carcinoma, and renal cell carcinoma. Organized by organ system, the text highlights new therapies such as novel forms of androgen deprivation, cytotoxic chemotherapy, immune check point and immunomodulatory agents, and targeted therapies. Written by experts in the field, the book also reviews current chemotherapy and immunotherapy regimens for genitourinary malignancies and discusses indications, outcomes, and toxicities, as well as clinical trial concepts. Each of the book's chapters offers a bulleted box of clinical pearls on the particular role of the APP. Chemotherapy and Immunotherapy in Urologic Oncology: A Guide for the Advanced Practice Provider is a resource for urologists, uro-radiologists, medical clinicians and family practitioners alike, familiarizing its audiences with systemic therapy regimens for urologic malignancies, as well as their expected outcomes and side effects.

NCCN Guidelines for Patients® Kidney Cancer Springer

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Ovarian Cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Ovarian cancer basics, Treatment guide, Survivorship, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers, Index.

Analysing Survival Data from Clinical Trials and Observational Studies Lippincott Williams & Wilkins
[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this

essential guide to Gallbladder and Bile Duct Cancers. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Gallbladder and bile duct cancers, Testing for gallbladder and bile duct cancers, Gallbladder and bile duct cancer treatments, Gallbladder cancer 54 Intrahepatic bile duct cancer, Extrahepatic bile duct cancer Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers. Let this authoritative handbook be your guide!

Nephron-Sparing Surgery Springer

[KIDNEY CANCER ASSOCIATION NCCN AUTHORIZED SPANISH VERSION] From 27 leading cancer centers united under the National Comprehensive Cancer Network(r) (NCCN(r)), comes this essential guide to Kidney Cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients(r) are packed with the latest information, treatment innovations, and resources about Kidney Cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide! Part 1-Kidney cancer basics: Explains where kidney cancer starts and how it spreads. Part 2-Testing for kidney cancer: Describes the tests used to find and confirm kidney cancer. Part 6-Making treatment decisions: Offers tips for getting a treatment plan that meets all your needs. A complete glossary with dictionary and acronyms completes this book.

NCCN Guidelines for Patients® Gallbladder and Bile Duct Cancers CRC Press

This book provides a comprehensive overview of the biological basis of renal tumors in childhood and the clinical approaches to their treatment. Recent advances in our understanding of the molecular genetics of Wilms and other renal tumors are placed in their clinical context, including the differing treatment approaches of immediate surgery or pre-operative chemotherapy. The challenges in applying this knowledge to improve risk stratification and to incorporate biologically targeted agents into front-line therapy are discussed. All of the authors are experts from Europe and North America and the book has been written specifically as an easy reference for the practising clinician and the research scientist. It lays the basis for understanding the future direction of clinical and translational research to improve outcomes in patients with childhood renal tumors and will

prove indispensable for those treating or researching into these diseases.

Renal Cancer Springer

This book is a must for all those with neuroendocrine cancer. Neuroendocrine cancer has been called the "Good Looking Cancer" since the tumors give off hormones gives the patient an improved appearance. As a NET cancer patient, Bob Walsh, has compiled this invaluable resource filled with vital information, treatment alternatives, knowledgeable oncologists, references, glossary of terms, and the importance of faith as documented by two miracles. He describes everything he has experienced and learned first-hand about this deadly, rare cancer. Bob Walsh decided to write this book when he learned in 2017 that he had something in common with celebrities like Steve Jobs, Aretha Franklin, John Wayne, the great NFL running back, Walter Payton, Betty Davis and others - we all had the rare, incurable neuroendocrine cancer. To his dismay, he soon discovered there was relatively little information or understanding of this deadly disease ... and there were few doctors or oncologists who had any experience with it. Bob went about learning everything he could while he has been studied and treated at seven leading cancer centers in America. This book is an absolute must for those who have neuroendocrine cancer, their doctors, caregivers, family and friends.

Upper Urinary Tract Urothelial Carcinoma

[OFFICIAL CURRENT VERSION] From 27 leading cancer centers united under the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to Ovarian Cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information, treatment innovations, and resources about Ovarian Cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide!Part 1-Ovarian cancer: Explains where ovarian cancer starts, how it spreads, and the symptoms it may cause.Part 2-Testing for ovarian cancer: Describes the tests doctors use to find and confirm (diagnose) ovarian cancer and plan treatment.Part 3-Cancer staging: Explains how doctors assess and rate the extent of ovarian cancer in your body.Part 4-Overview of cancer treatments: Describes the treatments that are used for ovarian cancer.Part 5-Treatment guide for epithelial ovarian cancer: Presents the recommended course of action for epithelial ovarian cancer from diagnosis to after cancer treatment.Part 6-Treatment guide for LCOH(less common types of ovarian histopathologies): Presents the recommended course of action for less common types of ovarian cancer from diagnosis to after cancer treatment.A complete glossary with dictionary and acronyms completes this book.
