With the unprecedented expansion of interest in acupuncture around the world, the need for a standard international nomenclature has become increasingly apparent.

Practitioners and researchers every-where must speak a common language as they attempt to ascertain the clinical benefits of acupuncture and elucidate the underlying physiological mechanisms. This report records the consensus reached by a Who Scientific Group on a standard international acupuncture nomenclature which met in Geneva from 30 October to 3 November 1989. Building on the proposals of expert meetings organized by the Who Regional Office for the Western Pacific since 1981, the Scientific Group agreed that the standard international nomenclature should comprise an alphanumeric code as well as the Han character names of meridians and acupuncture points, along with their transliterations into the Chinese phonetic alphabet (Pinyin) and their English translations. The experts went on to propose standard

nomenclature for the 14 main meridians, the 361 classical acupuncture points, the 8 extra meridians and the 48 extra points, and for scalp acupuncture lines.

"Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and

innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one

family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience

intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.
